Background

Summary

Brian K. Buchheit is a registered patent attorney who focuses upon software, telecommunications, and electronic patents. He has drafted and prosecuted hundreds of patents for Fortune 500 companies. Brian managed multi-million dollar telecommunication and software projects when working as a communications officer/system engineer in the United States Air Force. Following his time at the USAF as a Captain, Brian decided to pursue a law career. Brian graduated in the top 5 percent of his law school class, where he had the distinction of briefly clerking for a federal judge (Judge Hinkle), whom he assisted in numerous patent cases. In 2005, Brian left Akerman Senterfitt and founded Patents on Demand, P.A., a law firm dedicated to high quality patent application preparation and prosecution.

Specialties: software systems, telecommunications, databases, networking, and electronic patent preparation and prosecution

Experience

CEO

Patents on Demand

August 2005 – Present (8 years 7 months)

Patent Attorney

Patents on Demand, P.A.

January 2005 – Present (9 years 2 months)

In 2005, Brian Buchheit left Akerman Senterfitt to establish Patents on Demand, P.A., a boutique patent practice anchored in Weston, FL, with the idea of ensuring quality work product and customer service be emphasized over throughput alone. Patents on Demand focuses on patent law related to computer and electrical engineering (software systems, telecommunications, databases, networking, electronic circuits and processors, medical devices, etc.). Our patent attorneys have industry experience in the technical fields in which they practice, extensive large law firm experience, and/or inhouse counsel experience from a Fortune 500 company. Our investment in an advanced docketing system (CPA Global's Foundation IP), substantial infrastructure, and experienced administrative staff allows us to overcome the potential disadvantages of a smaller firm, while providing the advantages, including cost effectiveness, agility and a principle attorney's focus on your invention. Additionally, we maintain modest office spaces and minimal extraneous overhead (e.g., there is no tier of excessively paid, non-working attorneys absorbing a significant percentage of fees charged to clients.) A majority of our patent drafting efforts are performed on a fixed fee basis, which includes administrative costs like preparing/filing IDS's, assignments, etc. Office Action responses are generally capped at an agreed upon ceiling. Our business model is designed to ensure that our clients receive timely, cost effective patents of the highest quality.
